2025 onwards

T-LEVEL Health

Core content

All students will develop a general understanding of health and science:

- working within the health and science sector
- health, safety and environmental regulations
- managing information and data
- principles of good scientific and clinical practice
- core science concepts including the structure of cells, tissues and large molecules, genetics, microbiology and immunology

They will also learn about topics specific to health, including:

- understanding the healthcare sector
- providing person-centred care
- supporting health and wellbeing
- further knowledge of both human anatomy and physiology and of diseases and disorders
- infection prevention and control

In addition to the core content, each student must choose one of the following specialisms:

- assisting with healthcare science
- (from September 2022) optical care services

This course is suitable for anyone interested in a career in health or science. Students can progress into roles such as:

- healthcare science assistant
- radiography assistant
- sterile services technician
